OUR SOLUTION

By starting a loyalty society and connecting people to each other along with the power of decision making, it can be predicted that a strong and unanimous society will take steps towards achieving the goals.

The road map is clear and based on it, our society decides whether to do something or not.

Our initial capital is provided through pre-sale of token, sale of part of shares and supply of token in exchanges.

Salaries are paid to the golden members of the loyalty society on a monthly basis.

There will be no authentication for membership in the society, and only the efficiency and companionship of people is of special importance to us.

Polls will be held at all stages, and all comments will be important to us.

Also, decisions regarding humanitarian aid will be voted upon by the proposal of the main committee, and all steps will be carried out in a completely transparent manner.
